

ROLLER BEARING TYPE CAM FOLLOWERS

CATEGORY: Mandatory At Next Maintenance

SUMMARY: CarnaudMetalbox Engineering have introduced a new design of cam follower as standard on the 5000 Bodymaker.

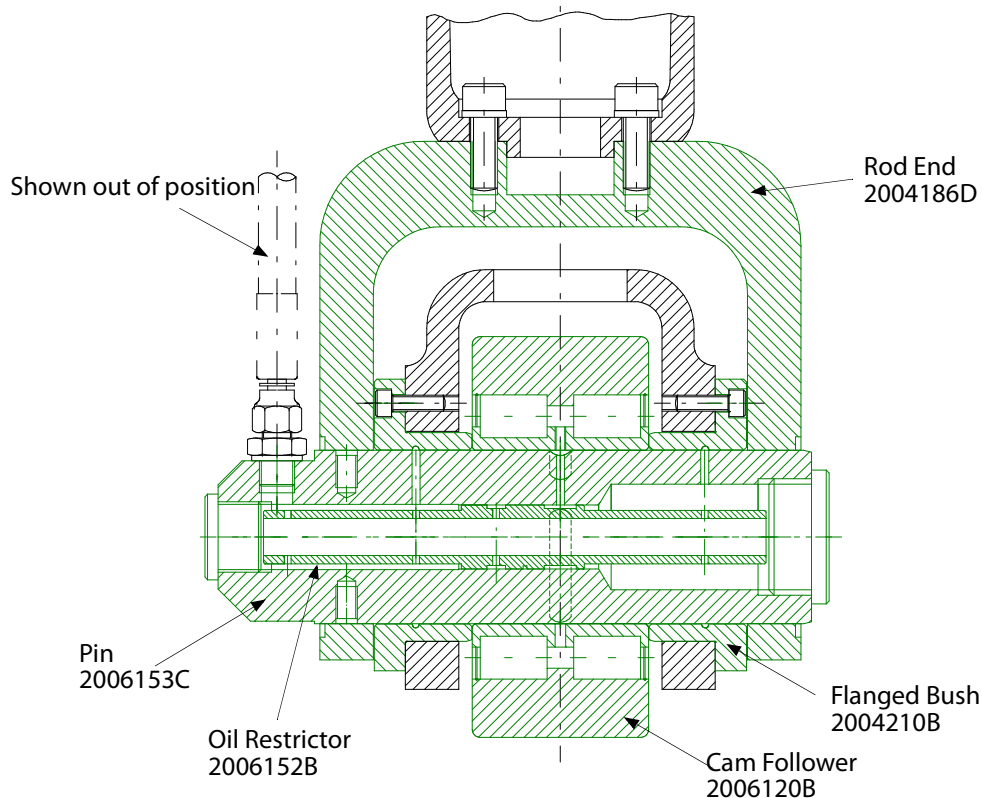

This now incorporates a Rolling Element Cam Follower Arrangement which has an improved life expectancy and will combat faster acceleration rates required for high speeds because of the smaller contact area given by the rolling elements. The crowned Follower O/Dia. gives improved Cam contact

When initially retrofitting the cam follower it will come complete with Follower, Spindle, Rod End, Flanged Bush and Oil Flow Restrictor Spiral but once fitted only the Follower is required for spares.

This technical bulletin is applicable to all 5000 Bodymakers, and was fitted as standard from serial number 198s. It is available in a simple to fit retrofit package and enables a total fitting time of four hours.

For further information about Rolling Element Cam Followers, please contact one of the references at CarnaudMetalbox Engineering detailed below, quoting Technical Bulletin number **TB5000-047**.

Note: A complete Library of Technical Bulletins is accessible on the Company Web Site.
