

CONVERSION TO ONE PIECE ALL ALUMINIUM “PADLESS” YOKE SLIDE ASSEMBLY

CATEGORY: Recommended

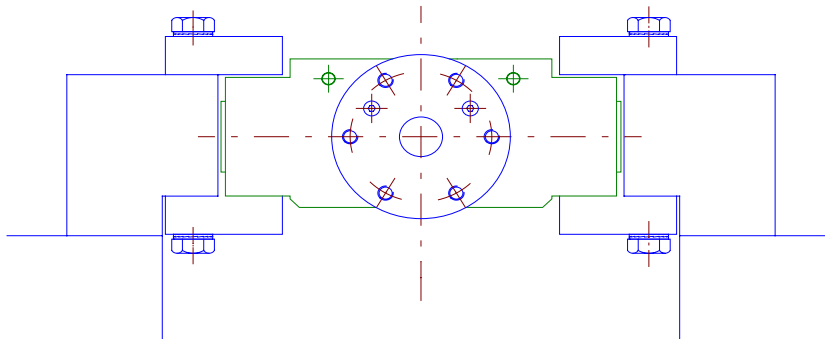

SUMMARY: CarnaudMetalbox has developed as part of the new Mark II series 5000 Bodymaker an all aluminium one piece Yoke Slide Assembly which does not have any bronze running pads. This new arrangement provides for a simpler and more accurate design and eliminates the bronze pads which are often subject to corrosion attacks by acids formed in the lubricating oil.

An upgrade kit of parts is now available for all existing B3 / B4 Bodymakers to convert to the new one piece aluminium “Padless” Yoke Slide.

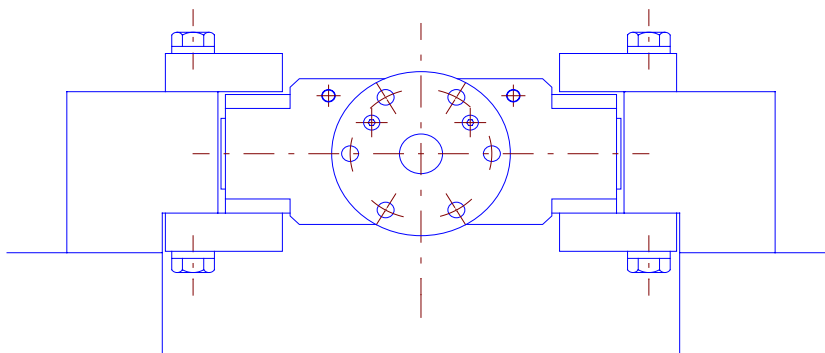

This upgrade kit is applicable for all B3 / B4 Bodymakers Currently fitted with the aluminium Yoke Slide

For further information about the Conversion to one piece all aluminium “padless” Yoke Slide Assembly, please contact either of the references at Carnaudmetalbox Engineering detailed below, quoting the technical bulletin number **TB-B3/B4-006**.

Note: A complete Library of Technical Bulletins is accessible on the Company Web Site.
