

CATEGORY: Recommended to aid quick change with environmental benefits.

Summary: Where possible CMbE are reducing the amount of chrome plating on component parts due to the increasing difficulties of using this material because of its environmental impact. By changing the material to hard wearing plastic, this significantly reduces the weight without compromising performance. The plastic Trimmer Starwheel weighs approximately 80% less than the Chromed Steel Trimmer Starwheel making it ergonomically beneficial for manual handling during a change over.

Chromed Steel Trimmer Starwheel
