

Tis the season to be jolly and to have some fun with our free Christmas Agamograph Template!

There is something quite magical to agamographs, two perspectives, two festive pictures. With Christmas time approaching, download and print our printable agamograph template to keep the kids busy during the holidays.

What you will need

Christmas agamograph templates

Print paper

Printer

Colouring supplies

Scissors

Skewer (optional)

Optional:

To make things even more festive, you can also use red glitter glue to make the reindeer nose sparkle.

Colour the template in with your favourite colouring supplies – we really do recommend markers as they really make the designs pop!

Ready to give it a go? Print out our template and let's get crafting!

Our template images are below for a useful guide

Tip! Why not practice what colours to wish to add to these template images to make it easier to follow when colouring in your agamograph?

How to Make your Christmas Agamograph

Step 1

Print out the template

(you can find it at the end of this document).

Step 2.

Colour in the images. Don't forget to match the image colours up for each section!

Tip: We recommend using contrast colours for the background to really make it pop - use the helpful image template on page 1 to help you decide your colours

Step 3

Once the images are coloured in, cut out the agamograph around the outside edge only.

Step 4 - optional

To make the folds sharp, it's best to score them before folding – Use a ruler and run a skewer across the folds.

Alternatively ask an adult to help if you are using a scoring tool or scissors.

Make the sure edges
Fold facing up

Step 5

Once you have scored all the folds (or skipped that step) it's time to fold them.

Fold in a accordion fashion – from one end to the other. Make sure the first fold is colour side up

Press down the folds, crease them to make them even crisper as you go.

All done!

Now all that's left to do is to move it from one side to the other to reveal both pictures!
