

### Rear Air Bag Exhaust Plumbing

**CATEGORY:** Information for Factory Implementation

**Summary:** CarnaudMetalbox Engineering introduce a design upgrade for the Rear Air Bag Exhaust Plumbing to allow customers to benefit from faster exhaust times.

As a result of customer feedback and after in house trials CarnaudMetalbox Engineering have upgraded the Rear Air Bag Exhaust Plumbing Piping from 6mm to 12mm. This upgrade continues to use the existing exhaust valve fitted to all bodymakers as standard but bypasses the non return valves. As a result exhaust times are considerably reduced and production maximized.

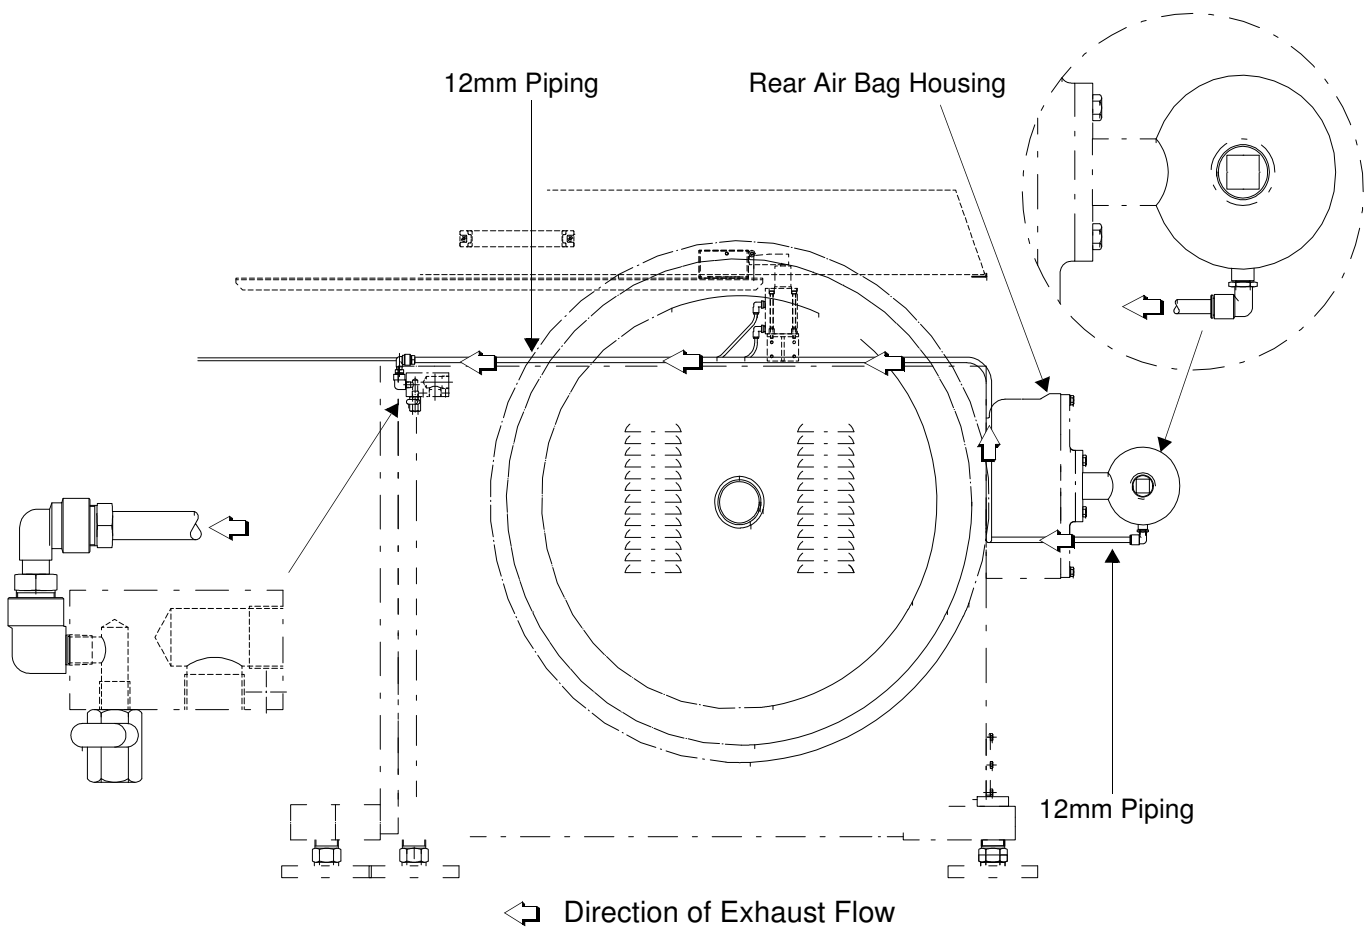

Figure 1

This upgrade is applicable to both the Standard (See Figure 1) and Rear Air Bag Monitoring System (See Figure 2) designs fitted to CarnaudMetalbox Bodymakers and takes less than an hour to implement.
