

Lightweight Steel Fabrication Swing Lever

CATEGORY: Recommended

Summary: Acknowledging the service that the Carbon Fibre Swing Levers have now seen in production and that some failures are now being experienced, CarnaudMetalbox Engineering has introduced an ideal economical replacement.

The Carbon Fibre Swing Levers on our B4 machines are now between 12 and 17 years old.

The new lever design used in our 5000 machines is a ready-made replacement. We strongly recommend customers seriously consider and make provision for replacement. This will prevent any untimely and costly down time and ensure peace of mind
